

DO YOU KNOW HOW TO THROW OUT YOUR MEDICATION?

DELIVER AT A PHARMACY:

- Medicine packaging, including boxes, blisters and leaflets.
- Medicines that are out of date or that you will no longer use.
- Tubes, syrup bottles and the respective spoons or syringes.
- Inhalers and holding chambers.

This prevents contamination of soil and water and allows containers to be sent for recycling, after separation and classification.

PROTECT THE SOIL, PROTECT THE WATER
PROTECT THE PLANET, PROTECT YOURSELF
